

Written exam – Moodle Quiz

Semester: EN3/AIE3 Esbjerg

Exam Course: Applied Engineering Mathematics

Date: **14th of January 2026**

Time: **09:30 – 13:30** + 15 min. to upload document in Digital Exam

Exam guidelines for the use of aids in this specific exam:

- You may access the course page in Moodle and Digital Exam.
- Books, notes, and tables can be brought either in paper form or electronically, but *only static text documents* are allowed – e.g., PDF documents or Word documents *without the use of macros/add-ons*.
- One PC with *Aracanic Observer* installed and active during the exam.
- Questions must always be addressed to the invigilators.

Not allowed aids:

- The use of AI tools, including ChatGPT, is strictly prohibited.
- No electronic calculation equipment is allowed. Calculators, computer algebra systems, Word documents with embedded macros, electronic watches, and similar devices are therefore not permitted during the exam. This also applies to simple calculators. Add-ons for programs like Microsoft Word (such as WordMat) may not be used for calculations. However, software for graphical representation of functions is permitted, provided that it cannot be used for any kind of calculation.
- Any kind of communication with others or file sharing is NOT allowed during written Exams.
- Use of the internet is NOT allowed, except for access to Moodle and Digital Exam.
- Headphones are NOT allowed, whether wired or wireless. Earbuds are also not allowed as hearing protection, even if no music is being played. Only non-electronic earplugs (e.g. foam earplugs) may be used.

Procedure for the digital written examination in Moodle

- You must use two-factor authentication to log in to Moodle, after which you must put your mobile phone away.
- You will gain access to the exam questions in Moodle at 9:30. You have 4 hours to complete and submit your exam. A 15-minute window is provided if you do not start exactly at 9:30, but the total time limit remains 4 hours. After this, the quiz will close automatically. (*Moodle automatically stores results at each page change, but the last results may not be saved if you have not pressed "Submit" within the four-hour limit.*)
- The exam will be in multiple-choice format. It will not be possible to provide intermediate calculations.
- For sub-questions with multiple answers, points may be deducted for incorrect answers, however, the total score for a sub-question cannot be negative! These assignments will be marked with "Correct answers yield positive points, while wrong answers count negatively. The total score of this sub-question cannot be negative."
- The order of answer choices will be shuffled (students will see them in different order).
- Within this exam session, you are only allowed one attempt at the Moodle quiz. When you press the "Finish attempt" button on the last page, the attempt is submitted, and you cannot edit your answers or restart the quiz. If you have not pressed "Finish attempt," you may go back and review your answers (your results are stored) before submitting.
- **Note: If you have not pressed the "Finish attempt" button by the end of the 4-hour limit, Moodle will automatically submit your stored answers.**
- *Remember to submit an empty document for the Digital Exam to register that you have completed the exam (as described above).*

Submission:

- After completing the quiz in Moodle, you must upload a PDF page in Digital Exam between 13:30–13:45. The document must include your name and the name of the exam you participated in.
- Your answers must be uploaded to Digital Exam during the last quarter as one PDF file. After 13:30 you are no longer allowed to answer any of the assignments.
